“Change Management”

INTERIM MANAGEMENT

Do you need:

- To focus **ADDITIONAL MANAGEMENT EFFORT** on specific business problems?
- To provide **TEMPORARY MANAGEMENT COVER** for key positions?

We can help you achieve all the above and more!

Interim Management can be used to address specific business problems by supplementing the existing management team with additional skills and resources on a temporary basis. This additional resource can be used to directly address the problem, or it could be used to provide cover for an existing member of the management team, so that they have the time to focus on the problem themselves.

Interim Management can also be used to fill short-term gaps in the management team caused by unplanned events such as serious illness, resignation and dismissal, or even planned events like maternity leave.

We are able to provide an Interim Management service covering the following disciplines primarily within a manufacturing or technology based business:

- Operations Management.
- Production Management.
- Project Management.
- Engineering Management.
- Quality Management.

Employing an Interim Manager instead of an “agency temp” has the following advantages:

- The professional interim manager has the skills and ability to contribute to the business from day one.
- A professional interim manager will generally operate independently and deal directly with the client. This means that they are directly accountable for their own performance.

As a result, the professional interim manager is generally better placed to deliver the best possible service.

We operate through a Limited Company with all work covered by Professional Indemnity Insurance.
